

***Rise Above the Competition and "Feed the Difference!"***

### **INTRODUCTION:**

We know feed. Actually, we have been making quality feeds since 1920. This experience has helped us formulate the best mix of high quality grains and essential nutrients to properly feed your show cattle. With feedback from the top show cattle breeders and feeders in the industry, and the best show feed ingredients on the market, we are confident that you will see the difference when you "Feed the Difference" with Hamilton Show Feeds. Past champions have trusted our "Show Grower" to properly start their calves, and our "Show Finisher" to bring them to the Winner's Circle.

### **HERE IS WHAT PEOPLE ARE SAYING ABOUT HFB SHOW CATTLE FEEDS:**

**"The first time I opened a bag of HFB Show Cattle Grower, I knew these folks were on to something good. We have been feeding it ever since and I can honestly say it does everything we expect out of a show feed. Calves have more bloom and a great appetite and fat steers put on the right kind of finish while still growing great hair."**

- Matt Williams, Williams Show Cattle, Cassopolis, MI

**"There are several things I would like to commend you on regarding Hamilton show feeds. This is the FIRST show feed that we could actually finish our steers on without having to add other feedstuffs to the ration. The other show feeds we have tried simply could not get our steers fat. Also, we appreciate how consistent the blend is from bag to bag and batch to batch. This makes cattle want to eat and stay on feed, even at shows."**

- John Miller, J/C Simmentals, Clare, MI

## **HFB SHOW CATTLE GROWER**

In order to allow your show cattle to express their true potential, it is important to provide them with the ideal nutritional feeds. HFB Show Cattle Grower is the best way to start your project off on the right hoof. Unlike other feeds that use strictly traditional grains like corn and oats, we blend HFB Show Cattle Grower to provide the best ratio of carbohydrates, fiber, and energy. To avoid "burning a calf out" with too high of a protein diet, HFB Show Cattle Grower utilizes the right combination of whole cottonseed, steam-crimped barley, cottonseed hulls, steam-crimped oats, steam-flaked corn, the highest quality protein pellets, and all of the essential vitamins and minerals. This feed will help properly develop and grow your show calves into the champions you envision.

### **HFB SHOW CATTLE GROWER:**

- Is designed to be fed to show steers from 400 lbs to 900 lbs depending on the calf's show ring needs.
- Is designed for show heifers from 400 lbs throughout their show career.
- Should be fed to calves at approximately 2.25% of their body weight along with suitable grass type hay. Feeding greater than 2.25% of the calf's body weight can occur when a desired growth pattern is dictated by the feeder.
- Is an ideal blend of high quality fibers and carbohydrates, providing a feed to maximize your calves' ability to digest nutrients and maximize muscle development.
- Is formulated to promote healthy hair growth and bone development for optimal show ring appeal.
- Contains 14% protein, 4% fat, 12% fiber, and is fortified with the proper amount of vitamins and minerals.
